Personal Statement

A proactive, dedicated and self-motivated student that has finished 2nd year and going to my final year. I am studying Information and Communication Technology at De Montfort University. From my 1st and 2nd year of university, I have gained brilliant skills such as preparation and team work. As a hard-working student, I want to gain further knowledge and experience in the technology field.

Archbishop of Lanfranc: 2008 – 2013

GCSEs: Spanish (C), Biology (C), Chemistry (C), Physics (C), Maths (B), English (C)

Employment

H&M – July 2016

- At H&M my prime responsibility was to handle delivery and stock and occasionally assist my colleagues on the shop floor, especially during busy hours. As part of my role, my duties included assisting customers, lending them a hand and advising them on products. Working in retail has helped me further improve my communication skills and at the same time it helped me develop my confidence in approaching customers.

Day Lewis Warehouse – June 2016

- Working for Day Lewis was great as I met people from different countries, this meant that some of the employees had accents. This helped me because it helped me improve my listening skills, as some of the employees struggled to pronounce some words. Furthermore, I improved my teamwork skills as I helped members with finding products and asked other members if I was not sure because they were different brands, making sure wrong products were not selected. If the products were not to be seen, then I had to search for the products on the database to check if it is available or not.

Work Experience

Community Pharmacy – Day Lewis – 2012

- I worked in a community pharmacy for two weeks and it was great working with other members as it allowed me to gain team-working skills and further improve my communication skills. My role was to check expiry dates of medication, directed customers to products and assisted in advising them on selection of products.

Skills

- Languages: English and Gujarati
- IT skills: PowerPoint, Word, Excel, Notepad++ and Visual Studios
- Programming languages: C#, HTML, CSS, JavaScript and SQL
- Full UK manual car licence
- Good verbal communication
- Good level of numeracy

Interest

I enjoy meeting new people, playing sports with my friends, spending time with family and travelling.
